Have you ever felt like life was beating up on you because you dared to be different or tried to defend what you felt was right? This author describes the painful details from her childhood as she pioneered during the most challenging times of her life-the times when schools in the South were being desegregated. Although the challenges described in this book took place during the Civil Rights Movement, the experiences shared by the author are by no means limited to color barriers. The author shares her story to encourage anyone who may be perceived as different-no matter if they are young or old, tall or short, overweight or not, shy or out-going, or male or female. This book is written for anyone who may be feeling despair because they have been mistreated in life. It is written to encourage you to face life's challenges and to believe that God will give you the strength to break through barriers.

One piece of important advice to the my readers ...Be yourself. Own your story. Have the courage to say "this is who I am. This is what I went through. And this is how I will not allow what happened to me to define me. I will define it and what place it holds in my life." Don't fall into the victim mentality of blaming life and everyone for what you went through. Is there blame on them? Maybe. But that will get you nowhere. You have to focus on yourself. On what YOU make of it. it happened, yes. It cannot be changed though. What YOU do with it, how YOU end it, THAT is what you need to focus on.Always remember Your sensitivity is not a sign of weakness. Your sensitivity makes you beautiful. It makes you different. It makes you unique. You see, we live in a world where it's easier to pretend that you don't feel, and if you dare express that you feel, you become an easy target to be picked on and hurt. So, from a young age, you're taught that strength means hiding how you feel, or not expressing your feelings at all. I want you to ask yourself, if you don't feel, how can you truly love? If you don't feel, how can you empathize with the tragedies happening in the world? If you are sensitive to being disrespected, it means that you will not disrespect others because you know how it feels to be disrespected. If you are sensitive to being ignored or lied to, you will not ignore or lie to others because you know how it feels to be ignored and lied to. Promise yourself from today to be at peace with your sensitivity. Instead of trying to hide it, cherish itKeep being proud of who you are, with every part of yourself. Keep growing as a person. Keep climbing. Keep fighting on that road call life journey..

A company's worst enemy isn't always the competition. Sometimes it's the fear that lives within its own walls. This fear can take many forms: fear of not meeting a goal, of not getting a bonus, of losing decision rights and respect. Fear compels employees and managers to protect themselves by creating seemingly impenetrable barriers fortified by rules and practices that benefit one group while harming others. Left unchecked, fear-driven barriers can spread at an alarming rate in a company. Workgroups define success not by reaching the company's overall goal, but by fulfilling their part of the process. Restrictive policies pile up until managers start to exert extreme control over headcount and resources. Other managers feel compelled to build empires -- taking over other departments' functions to regain or enhance their self-sufficiency. In the midst of these counterproductive activities, employees suffer, success deteriorates, and efficiency dies. While these barriers might seem insurmountable, they aren't. They were built internally, and they can be destroyed internally. By learning from the real-world lessons in this book, leaders, managers, and employees can overcome barriers that plague their company. It takes courageous leadership, and it can be difficult, but the result will be nothing less than transformational.

They said, "No!" She asked, "Why?" The answer was always the same: "Because you're a woman." She vowed to shatter each barrier they placed in her way. Inquisitive and precocious, Laura Bassi grew up on the Italian Peninsula in the 1700s, dreaming of studying science at the famed University of Bologna. It was the Age of Enlightenment and although forward-thinking philosophical ideas and scientific discoveries flourished, the prevailing edict was that college was no place for a woman--no matter how capable, intelligent, or innovative. Laura was told to trust that she would find fulfillment as a dutiful wife and mother. But why, she wondered, couldn't she have it all? Smugly assuring themselves of Laura's failure, the ivory tower establishment fought to keep her out of their hallowed halls. Yet, despite restricted access to libraries and laboratories, Laura earned the respect of Europe's top scientists and scholars. She was determined to earn a doctoral degree and teach college physics, something no woman had ever done. Renouncing the societal norms of the day, Laura never stopped working towards a time when a woman would have the same opportunities as a man, be held to equivalent standards, and realize equal rewards. But first, she had to master Newtonian physics.
