I will use the short 150cc case to retain the 10" wheelset but I do have a question of the 150cc axle shaft being a bit longer plus the difference of rear drum brake size between the 13" 150cc and a 10" wheel size of the 150cc GY6 stuff. May have to aquire a gear upgrade to make the 10" rim work to be able to post speeds of 50-60MPH
