This book describes the philosophy and the use of Aleister Crowley's Thoth Tarot, a deck of Tarot cards designed by Crowley and co-designed and painted by Lady Frieda Harris. The Thoth Tarot has become one of the best-selling and most popular Tarot Decks in the world. It is also one of the most original interpretations of the tarot, incorporating astrological, numerological, Egyptian, and Qabalistic symbolism. While there are many other useful guides to this famous tarot deck, there are no others that explain the deck in its designer's own words. The book is divided into four major parts: * Part One: The Theory Of The Tarot. * Part Two: The Atu (Keys or Trumps). * Part Three: The Court Cards. * Part Four: The Small Cards. Part One is further divided into three chapters; Part Two into two chapters and an appendix; Part Three into one chapter; and Part Four into one chapter. The book includes a list of plates depicting the Tarot cards as seen by Crowley and Harris.

School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

Do we really need philosophy? The present collection of jargon-free essays aims at answering the question of why philosophy matters. Each essay considers the central question (Why Philosophy?) from different angles: the unavoidability of doing philosophy, the practical consequences of philosophy, philosophy as a therapy for the whole person, the benefits of philosophy for improving public policy, etc.

During his late period, Nietzsche is particularly concerned with the value that mankind attributes to truth. In dealing with that topic, Nietzsche is not primarily interested in the metaphysical disputes on truth, but rather in the effects that the "will to truth" has on the human being. In fact, he argues that the "faith in a value as such of truth" influenced Western culture and started the anthropological degeneration of the human type that characterizes European morality. To call into question the value of truth is therefore necessary, if one wants to help mankind to find her way in the labyrinth of nihilism. In this new addition to Nietzsche scholarship, Gori explores the origin and aim of the philosopher's late perspectival thought by merging the theoretical with the historical approach, with a special focus on the epistemological debate that influenced Nietzsche. As a result, the book provides a contextual reading of the issue that supports the idea

that Nietzsche's attitude in addressing the problem of truth is, in a broad sense, pragmatic.
