Dinosaurs and All That Rubbish by Michael Foreman
This is a great thought provoking story which can be enjoyed by children of all ages. The pictures are colourful, bright and friendly. Although published in 1972 the message of pollution and the importance of recycling remains the same and is probably even more relevant today.

After humans leave the barren Earth for a distant star, the dinosaurs come back to life and tidy up the mess that the humans have left behind. The dinosaurs will only then allow the humans to come back to Earth once they have agreed that the planet should be shared and enjoyed by everyone.

Based on the best-selling book by Michael Foreman, Dinosaurs and All That Rubbish is an ever-topical musical play for young people, with an environmental theme. Man destroys his own world through misuse and disrespect, only to search for a replacement in the stars. In his absence, the Dinosaurs return to Earth to discover desolation and destruction. In this humorous and intelligent story, the dancing Dinosaurs restore the Earth to its former beauty, with the help of the Animal Kingdom. Ironically, when Man returns, he tries to lay claim to the new, blooming planet he has discovered; but he is reminded that this is the same decaying Earth he had ruined and abandoned.

They're stomping and stamping all over the place. Children will love finding out why in this classic environmental tale.

After ruining Earth and soaring off to a star in his rocket, the man returns to find that ancient creatures have beautified the earth and it is where he wants to live after all.

Encourage Crunch the dinosaur to come out to play in this giggly read-aloud about the art of making a friend from the author of This Book Will Not Be Fun and a Theodor Seuss Geisel Award winning-illustrator! Crunch is a lovely and quiet brontosaurus who has hidden himself in some shrubbery and is rather shy. He would like to play, but it will require some gentle coaxing from you! If you are patient and encouraging, you will find yourself with a new friend! This picture book is a warm, funny example of how to engage with someone new, who is perhaps a bit different from you. Lessons in friend-making (such as minding personal space and demonstrating interest in another's hobbies) are delivered so subtly that children will absorb them unconsciously as they delight in Crunch's silly hat and dance moves! Cirocco Dunlap (This Book Will Not Be Fun) and Greg Pizzoli (The Watermelon Seed) enchant and surprise us with their first collaboration. A Chicago Public Library Best Book of the Year!

A tiny dinosaur is born to a family of rather huge dinosaurs and everyone is mystified about why it is so different. As the littlest dinosaur grows, it feels left out and at odds with the world of its huge family, until one day its very size is the thing that rescues them all. A charming tale featuring every toddler's favourite - dinosaurs - with a sweetly told message about being happy being yourself. Brilliantly read by Claire Skinner. Please note that audio is not supported by all devices, please consult your user manual for confirmation.

For fans of Alice Munro, Anne Enright, and William Trevor comes a stunning debut collection from a deeply original writer and observer of love, betrayal, and turning points in ordinary peoples' lives. In a raw seacoast cabin, a young woman watches her boyfriend go out with his brother, late one night, on a mysterious job she realizes she isn't supposed to know about. A man gets a call at work from his sister-in-law, saying that his wife and his daughter never made it to nursery school that day. A mother learns that her teenage daughter has told a teacher about problems in her parents' marriage that were meant to be private—problems the mother herself tries to ignore. McLaughlin conveys these characters so vividly that readers will feel they are experiencing real life. Often the stories turn on a single, fantastic moment of clarity—after which nothing can be the same. Danielle McLaughlin is a writer of unparalleled precision and uncommon imagination. In her deft hands, ordinary people are transformed and surprising truths are suddenly understood. Praise for Dinosaurs on Other Planets “Dinosaurs [on Other Planets] marks the stateside debut (in book form, at least—a number of these already have appeared in The New Yorker) of Danielle McLaughlin, a writer of exceptionally deep empathy in the naturalistic tradition of John McGahern and Claire Keegan but with a knack for keen, and often disturbing, observation all her own.”—LitHub “McLaughlin’s immersive first collection casts a stern eye on individuals, couples, and families caught in nets of their own making, where even the mildest passion can lead to death, and journeys home with new lovers can reveal grim secret lives. . . . The title story, which opens up into an ambiguous ending rather than tying its strands up neatly, show[s] the ample bag of tricks McLaughlin has at her disposal.”—Publishers Weekly “Danielle McLaughlin’s short story collection Dinosaurs on Other Planets is a near perfect, enormously promising debut. . . . McLaughlin’s subject matter and themes are serious, undercut brilliantly by a sly strain of pitch-black humor. . . . A brilliant, quietly disturbing debut story collection [that] portrays Irish characters in the uncertain wake of the recent financial crisis.”—Shelf Awareness “In her collection, [McLaughlin] focuses on fraught relationships and those sudden, illuminating moments that can light up ordinary lives.”—Library Journal “This is not a debut in the usual sense, a promise of greater things to come. There is no need to ask what Danielle McLaughlin will do next—she has done it already. This book has arrived. I think it will stay with us for a long time.”—Anne Enright, Man Booker Prize–winning author of The Green Road “Danielle McLaughlin’s stories seethe, beneath elegant prose, with unfamiliar insights and entirely original observations. Only an author who loves what human beings are can so compassionately reveal them in all their flawed, gorgeous contradictions and communicate unmistakable joy while doing so. How glad I am to read this impressive new writer! Her fiction is a gift we need.”—Robin Black, author of Life Drawing

Dinosaurs prepare, enjoy the aromas of, and snack on chocolate chip, strawberry, and cinnamon cookies. On board pages.

100-Year Cover-up Revealed: We Lived With Dinosaurs makes our past coexistence with dinosaurs effortlessly apparent with a wide variety of proof ranging from artistic to documentary to scientific. Although it automatically invalidates evolution by proving coexistence, this book takes the extra step of examining and destroying, with logic and science, every major assumption and claim made by evolutionists, including the absurd notion that dinosaurs and humans missed each other by 65 million years. The sub-topic that runs throughout the entire book is that, for the past century, evolutionists have been brainwashing us with bogus claims while actively and passively covering up evidence showing that humans coexisted with dinosaurs and that evolution is basically a hoax. 100-Year Cover-up Revealed: We Lived With Dinosaurs not only proves the reality of coexistence and the fallacy of evolution, but also shows how the suppression of these facts has polluted our laboratories, classrooms, and media. Finally, this book highlights the scientific and educational implications of its conclusions and offers an intelligent alternative to evolution.

2017 is the 15th anniversary of the creation of Bob, Man on the Moon, celebrate with this anniversary edition. Enjoy the stunning artwork Simon Bartram has become famous for. Bob is everyone's favourite man on the moon: follow him on his daily adventures. Bob has a special job - looking after the moon. He keeps it clean and entertains passing space tourists as well as giving guided tours. He knows everything about the moon and that there is definitely no such thing as aliens!
