The Holden Commodore (VE) is an executive car that was produced by the Australian manufacturer Holden from 2006 to 2013. It was the first iteration of the fourth generation of this Australian-made model. Its range included the luxury variants, Holden Berlina (VE) and Holden Calais (VE); utility models were included as the Holden Ute (VE). As opposed to the VZ and all models previous which used ...

The single greatest issue is the timing chain fault that the V6 engine is very common for. Unfortunately the Holden V6 is known for stretched timing chains which is a very costly fix. We have addressed this in a previous blog post which can be found at the following link. Holden VE Commodore Stretched Timing Chains

Introduction This tutorial will show you how to reset the service reminder on the cluster of your Holden VE Commodore. The service reminder will display which service is due (Increments of 15,000). It will appear when your odometer is 1000km or less until the scheduled service, and will remain until it is reset using the process below.

## Resetting Service Reminder - VE Commodore - AutoInstruct

Holden VE Commodore V6: potential fuel leak In January 2008, a recall was issued for VE Commodore vehicles fitted with 3.6-litre V6 petrol engines as one of the fuel lines in the engine compartment could rub against a fuel vapour hose clip. For the VINs of the recalled vehicles, please see PRA 2008/9759.

The VE series of the Holden Commodore, introduced in late 2006, was the first Commodore to be developed from the ground up by Holden Australia. Known as the 'Billion Dollar Baby' project, a completely new suspension and chassis setup was developed with Australia's harsh climate in mind. 3.4 million kilometres of testing were carried out to ensure the new Commodore could handle everything ...

This comprehensive manual covers the complete Holden Commodore range including the Utility, Station Wagon and Statesman models. The first chapter, (Engine tune-up and maintenance) guides you through the most basic maintenance and tune-up procedures. It includes all specifications required, regardless of whether you are an owner wishing to change the oil, or a mechanic requiring detailed specifications for tune-up and maintenance. There are comprehensive chapters full of photographs and easy to follow instructions covering the 6Cyl. & V8 Engines, Automatic & Manual Transmissions, Fuel and Engine Management Systems, Brakes, Suspension, Steering, Rear Axle Assembly, Body Electronics, Heating, Interior & Exterior Body etc. There is a dedicated section covering Troubleshooting and Diagnostic Information as well as a comprehensive detailed electrical diagrams. The only manual available covering the complete VT, VX & VY family of vehicles. It is a must have for the D.I.Y. home mechanic through to the trade professionals. This comprehensive manual consists of 492 pages of step by step instructions with over 800 reference diagrams and photographs.

Series VT, VX, VY & VZ V6 engines: 3.6L & 3.8L V8 engines: 5.0L, 5.7L & 6.0L

For a long time, I have wanted to write this book to share my hard-earned secrets with the world on the secrets of the maintenance of cars as an engine reconditioner/mechanic. By trade, I have learnt many secrets of preventative maintenance to actually recondition an engine in a car and maintain it for hundreds of thousands of kilometres. I know that regular oil and filter changes and preventative maintenance make the difference between burning oil at one hundred kilometres and requiring a new engine and not burning any oil at four hundred kilometres because my maintenance schedule was followed following the recommendations under full servicing (chapter 3), and your car will last two and up to three times longer than normal, and if you want to restore or recondition any part of it, then it is all included in this book. Everything is outlined in fine detail on how to do everything. There are chapters in this book on servicing / engine reconditioning / transmission reconditioning / brakes / differential / clutches / painting and restoration of cars / stationary motors how to avoid the road toll / driving

tips and techniques / checklist before driving / minor servicing /desert survival / refrigeration how to build your own refrigeration box / what can happen when you befriend the wrong people and much, much more. The complete book of everything to do with car engines and vehicle maintenance and travelling also written to professionally repair smoky car motors and stop the pollution they create worldwide. This book is written with the intention of saving drivers lives worldwide and is written with the utmost care. All the maintenance and servicing of cars is how the author has done it down to the finest detail over the years for his customers cars and never received a single complaint about his mechanical repair supreme ability. This book is written by an engineer who knows how to manufacture cars, not just repair and maintain them. This book is written under my pen name because my other book and future books will be written under my pen name. They are all written to warn the unwary to help those who need help and keep the public informed. Got questions about how to fix/repair cars? This book will answer them all. A must-have book for the car glove box.
