inexplicable stories of predators befriending prey—an Indian leopard slips into a village every night to sleep with a calf. A lioness mothers a baby oryx. Ms. Holland narrates the details and arc of each story, and also offers insights into why—how the young leopard, probably motherless, sought maternal comfort with the calf, and how a baby oryx inspired the same mothering instinct in the lioness. Or, in the story of Kizzy, a nervous retired Greyhound, and Murphy, a red tabby, how cats and dogs actually understand each other's body language. With Murphy's friendship and support, Kizzy recovered from life as a racing dog and became a confident, loyal family pet. These are the most amazing friendships between species, collected from around the world and documented in a selection of full-color candid photographs.
