You will continue to access your digital ebook products whilst you have your Bookshelf installed.

For courses in Java programming Java Software Solutions establishes a strong foundation of programming techniques to foster well-designed object-oriented software. Heralded for its integration of small and large real-world examples, the worldwide best-selling text emphasises problem-solving and design skills and introduces students to the process of constructing high-quality software systems. The 9th Edition features a sweeping overhaul of Graphics Track coverage, to fully embrace the JavaFX API. This fresh approach enriches programmers' understandings of core object-oriented principles. The text uses a natural progression of concepts, focusing on the use of objects before teaching how to write them—equipping students with the knowledge and skill they need to design true object-oriented solutions. Provide Opportunities to Practice Design Skills and Implement Java Programs: A wealth of end-of-chapter programming projects and chapter review features help reinforce key concepts. Support Instructors and Students: Resources to support learning are available on the Companion website and Instructor Resource Center.

This book teaches beginners how to create well-designed software using Java and prepares them for both the A and AB advanced placement tests in Java. With a focus on object-oriented programming, teaching objects first and then writing classes, the authors identify the material, within an introduction to Java and a case study, that will be featured on the AP tests. Any student preparing to take the AP test in Java.

A self-study guide to NT Server 4 administration, Sams Teach Yourself Windows NT Server 4 in 21 Days offers more than 100 skill-building tasks to teach you everything you need to know to be an effective NT administrator. You'll learn how to make the switch from another network operating system, troubleshoot a server, optimize the network, and more. Topics covered include: Setting up an NT Server; Understanding the inner workings of the NT Registry; Migrating to NT from other network operating systems; Configuring and installing a variety of clients on an NT network; Designing and implementing an NT network for an organization; Securing a server with NT's powerful safeguards; Administering a server remotely with RAS; and Managing network printers with ease.

With lab exercises covering important topics in all 12 chapters, this lab manual will accompany the Fifth Edition of the Lewis and Loftus, Java Software Solutions. The exercises provide hands-on experience with programming concepts introduced in an introductory programming course. Manual solutions and source code are available online.

Loftus Jestin offers a facsimile of Designs (out of print since 1786) and a full-length interdisciplinary study of the collaboration of Bentley, Gray, and Walpole that produced this extraordinary book.
