Measuring Time | OR-AS

So the size of this impact on a business performance measure is a measure of a project's success. It's the size of the difference between the level of performance before the project's start time, and the level after the project's end time. You can easily measure the direct impact of a project with an XmR chart of the business performance measure the project aims to improve.

Measuring In-progress Project

Performance. Written by George

Pitagorsky. Measuring performance is a  
critical factor in optimizing performance.

Optimal performance is sustainably  
achieving multiple, often conflicting,  
objectives under changing conditions.

Project performance, on the surface, seems  
easy to measure; just track time, cost and  
scope and it's done.

Measuring In-progress Project

Performance

Introduction. Meant to complement rather
