pedagogical and curricular domain that is not exhausted within the domains of bilingualism and second or foreign language education. A heritage language is not a second or foreign language, it is the vehicle whereby cultural memory is transmitted over time, across distances, communities, and generations. Heritage languages play an important role ensuring the balance between coherence and pluralism in contemporary societies that have come to realize that diversity is an advantage for social, cultural, and economic reasons. The volume includes topics like First Nation indigenous languages, languages in diaspora, immigrant and minority languages, and contributions from North, central and South America, Europe, Africa, Asia, and Australia. It addresses the social, linguistic, and cultural issues in educational contexts in a new way by taking up questions of globalization, difference, community, identity, democracy, ethics, politics, technology, language rights and cultural policies through the evolving field of Heritage Language Education.

This book examines industrial and employment relations in the emerging economies of Brazil, China, India, South Africa and Turkey, and assesses the contribution of industrial relations institutions to inclusive development. The book uses real-world examples to examine the evolution of industrial relations and of organised interest representation on labour issues. It reveals contested institutional pathways, despite a continuing demand for independent collective interest representation in labour relations.
