The history of the United States started with the arrival of Native Americans in North America around 15,000 BC. Numerous indigenous cultures formed, and many disappeared in the 1500s. The arrival of Christopher Columbus in 1492 started the European colonization of the Americas. Most colonies were formed after 1600, and the early records and writings of John Winthrop make the United States the ...

For almost a century and a half, America was merely a group of colonies scattered along the eastern seaboard of the North American continent—colonies from which a few hardy souls tentatively ventured westward. After a successful rebellion against the motherland, America became the United States, a nation.

The story of America's greatest running legend. For five years, no American runner could beat him at any distance over a mile. But at the age of 24, with his best years still ahead, long-distance runner Steve Prefontaine finally lost. Driving alone at night after a party, Prefontaine crashed his sports car, putting a tragic, shocking end to the life and career of one of the most influential, accomplished runners of our time. More than 20 years later, Pre continues to influence the running world. From his humble origins in Coos Bay, Oregon, Pre became the first person to win four NCAA titles in one event. Year after year, he was virtually unbeatable. Instead of becoming one of the new breed of professional track athletes, Pre chose to stay amateur and fight for the adequate funding he felt American amateur athletes deserved. A man of incredible desire and energy, Pre trained relentlessly. In his drive to be the best, he spurred others to do their best. As one racer said, "He ran every race as if it were his last." But Pre not only touched runners; his exciting technique as well as his maverick lifestyle made him a favorite of the fans. A race with Prefontaine in it was automatically an event. His brief but brilliant life—documented by author Tom Jordan—is the tale of a true American hero. This is his story. "Some people create with words or with music or with a brush and paints. I like to make something beautiful when I run. I like to make people stop and say, 'I've never seen anyone run like that before.' It's more than just a race, it's style. It's doing something better than anyone else. It's being creative." —Steve Prefontaine *The e-book edition does not include photos

Just as U. S. soldiers and diplomats pulled out of Afghanistan, supposedly concluding their role and responsibility in the two-decade conflict, the country fell to the Taliban. In *The Long War*, award-winning BBC foreign correspondent David Loyn uncovers the political and military strategies—and failures—that prolonged America's longest war. Three American presidents tried to defeat the Taliban—sending 150,000 international troops at the war's peak with a trillion-dollar price tag. But early policy mistakes that allowed Osama bin Laden to escape made the task far more difficult. Deceived by easy victories, they backed ruthless corrupt local allies and misspent aid. The story of *The Long War* is told by the generals who led it through the hardest years of combat as surges of international troops tried to turn the tide. Generals, which include David Petraeus, Stanley McChrystal, Joe Dunford and John Allen, were tested in battle as never before. With the reputation of a "warrior monk," McChrystal was considered one of the most gifted military leaders of his generation. He was one of two generals to be fired in this most public of commands. Holding together the coalition of countries who joined America's fight in Afghanistan was just one part of the multi-dimensional puzzle faced by the generals, as they fought an elusive and determined enemy while responsible for thousands of young American and allied lives. *The Long War* goes behind the scenes of their command and of the Afghan government. The fourth president to take on the war, Joe Biden ordered troops to withdraw in 2021, twenty years after 9/11, just as the Taliban achieved victory, leaving behind an unstable nation and an unforeseeable future.

From the New York Times bestselling author of *Star Wars: Resistance Reborn* comes the "engrossing and vibrant" (Tochi Onyebuchi, author of *Riot Baby*) first book in the *Between Earth and Sky* trilogy inspired by the civilizations of the Pre-Columbian Americas and woven into a tale of celestial prophecies, political intrigue, and forbidden magic. A god will return When the earth and sky converge Under the black sun In the holy city of Tova, the winter solstice is usually a time for celebration and renewal, but this year it coincides with a solar eclipse, a rare celestial even proscribed by the Sun Priest as an unbalancing of the world. Meanwhile, a ship launches from a distant city bound for Tova and set to arrive on the solstice. The captain of the ship, Xiala, is a disgraced Teek whose song can calm the waters around her as easily as it can warp a man's mind. Her ship carries one passenger. Described as harmless, the passenger, Serapio is a young man, blind, scarred, and cloaked in destiny. As Xiala well knows, when a man is described as harmless, he usually ends up being a villain. Crafted with unforgettable characters, Rebecca Roanhorse has created a "brilliant world that shows the full panoply of human grace and depravity" (Ken Liu, award-winning author of *The Grace of Kings*). This epic adventure explores the decadence of power amidst the weight of history and the struggle of individuals swimming against

the confines of society and their broken pasts in this “absolutely tremendous” (S.A. Chakraborty, nationally bestselling author of *The City of Brass*) and most original series debut of the decade.

The National Book Award winning history of how racist ideas were created, spread, and deeply rooted in American society. Some Americans insist that we're living in a post-racial society. But racist thought is not just alive and well in America -- it is more sophisticated and more insidious than ever. And as award-winning historian Ibram X. Kendi argues, racist ideas have a long and lingering history, one in which nearly every great American thinker is complicit. In this deeply researched and fast-moving narrative, Kendi chronicles the entire story of anti-black racist ideas and their staggering power over the course of American history. He uses the life stories of five major American intellectuals to drive this history: Puritan minister Cotton Mather, Thomas Jefferson, abolitionist William Lloyd Garrison, W.E.B. Du Bois, and legendary activist Angela Davis. As Kendi shows, racist ideas did not arise from ignorance or hatred. They were created to justify and rationalize deeply entrenched discriminatory policies and the nation's racial inequities. In shedding light on this history, *Stamped from the Beginning* offers us the tools we need to expose racist thinking. In the process, he gives us reason to hope.

Teach your little historian about the founding of America with this exciting 200-word board book. This simple, engaging book introduces little ones to the story of the origins of America. Colorful illustrations paired with the toddler-friendly text help to explain the connection between the Declaration of Independence and the American Revolution, and today's Fourth of July festivities. Thoroughly researched, historically accurate, and accessible for even the youngest of children, *The Story of America's Birthday* helps readers understand the reasons we celebrate the birthday of our country every year.

A vivid character-driven narrative, fused with important new economic and political reporting and research, that busts the myths about middle class decline and points the way to its revival. For over a decade, Jim Tankersley has been on a journey to understand what the hell happened to the world's greatest middle-class success story -- the post-World-War-II boom that faded into decades of stagnation and frustration for American workers. In *The Riches of This Land*, Tankersley fuses the story of forgotten Americans-- struggling women and men who he met on his journey into the travails of the middle class-- with important new economic and political research, providing fresh understanding how to create a more widespread prosperity. He begins by unraveling the real mystery of the American economy since the 1970s - not where did the jobs go, but why haven't new and better ones been created to replace them. His analysis begins with the revelation that women and minorities played a far more crucial role in building the post-war middle class than today's politicians typically acknowledge, and policies that have done nothing to address the structural shifts of the American economy have enabled a privileged few to capture nearly all the benefits of America's growing prosperity. Meanwhile, the "angry white men of Ohio" have been sold by Trump and his ilk a theory of the economy that is dangerously backward, one that pits them against immigrants, minorities, and women who should be their allies. At the culmination of his journey, Tankersley lays out specific policy prescriptions and social undertakings that can begin moving the needle in the effort to make new and better jobs appear. By fostering an economy that opens new pathways for all workers to reach their full potential -- men and women, immigrant or native-born, regardless of race -- America can once again restore the upward flow of talent that can power growth and prosperity.

The deliberate devaluation of Blacks and their communities has had very real, far-reaching, and negative economic and social effects. An enduring white supremacist myth claims brutal conditions in Black communities are mainly the result of Black people's collective choices and moral failings. "That's just how they are" or "there's really no excuse": we've all heard those not so subtle digs. But there is nothing wrong with Black people that ending racism can't solve. We haven't known how much the

country will gain by properly valuing homes and businesses, family structures, voters, and school districts in Black neighborhoods. And we need to know. Noted educator, journalist, and scholar Andre Perry takes readers on a tour of six Black-majority cities whose assets and strengths are undervalued. Perry begins in his hometown of Wilksburg, a small city east of Pittsburgh that, unlike its much larger neighbor, is struggling and failing to attract new jobs and industry. Bringing his own personal story of growing up in Black-majority Wilksburg, Perry also spotlights five others where he has deep connections: Detroit, Birmingham, New Orleans, Atlanta, and Washington, D.C. He provides an intimate look at the assets that should be of greater value to residents—and that can be if they demand it. Perry provides a new means of determining the value of Black communities. Rejecting policies shaped by flawed perspectives of the past and present, it gives fresh insights on the historical effects of racism and provides a new value paradigm to limit them in the future. Know Your Price demonstrates the worth of Black people's intrinsic personal strengths, real property, and traditional institutions. These assets are a means of empowerment and, as Perry argues in this provocative and very personal book, are what we need to know and understand to build Black prosperity.
