A PT6A Overhaul includes the engine being removed, disassembled, cleaned, inspected, repaired as necessary and tested in accordance with factory overhaul manuals. Life limited rotatable parts cycle life is documented. The engine after a test cell run is approved for return to service with zero hours since major overhaul.

PT6A Overhaul | Parts Replacement | Machining | Inspection

The Pratt & Whitney Canada PT6 is a turboprop aircraft engine produced by Pratt & Whitney Canada. Its design was started in 1958, it first ran in February 1960, first flew on 30 May 1961, entered service in 1964 and has been continuously updated since. It consists of two basic sections: a gas generator with accessory gearbox and a free power ...
