This volume focuses on the social, cultural, and ecological consequences of a political economy of energy. This book will be of great interest to students and scholars of environmental political theory, as well as social scientists and humanities scholars who study the intersection of energy and society.

Includes index.

Since Gary Becker's seminal article in the late sixties, the economic analysis of crime has blossomed, from an interesting side field within law and economics, into a mature stand-alone sub-discipline that has been embraced by many well-respected academic economists. Wide ranging and accessible, this is the most up-to-date textbook in this area, taking current economic research and making it accessible to undergraduates and other interested readers. Without use of graphs or mathematical equations, Winter combines theory and empirical evidence with controversial examples from the news media. Topics discussed include: the death penalty, racial profiling, rational drug addiction and drug legalization, private crime deterrence, gun control, the privatization of prisons, juvenile crime, alternative social reforms to deter crime. By requiring no previous knowledge of economics, not only is this book a perfect choice for students new to the study of economics and public policy, it will also be of interest and accessible to students of criminology, law, political science, and other disciplines interested in the study of crime topics. By emphasizing the benefits and costs of social policy to deter crime, *The Economics of Crime* can be enjoyed by anyone who follows current public policy debate over one of society's most contentious issues.

This Approved Code of Practice (ACOP) on the safe use of woodworking machinery sets out the regulations from the Provision and Use of Work Equipment Regulations (PUWER 98) where specific ACOP and guidance material is necessary for woodworking machinery.

Classic Forms is an indispensable resource for turners, craftspeople, architects & designers. Topics and designs include mouldings, columns, pedestals, vases (Kraters, tazzas, bowls and urns), balusters, sun dials, basins, tables, candlesticks, lamps, stair rails, table & chair legs, finials, handles, feet and cord pulls, How to turn an object from a design and Improving a design. Highly visual, *Classic Forms* contains over 90 photographs, and more than 500 line drawings which can easily be used in making artefacts. It brings together in a new way foundational concepts from Ancient Greece and Rome and the extensive range of designs in many materials which have evolved from them. It will be invaluable in workshop, studio, design office or study.

Various failures resulting from attempts to bond rubber to metal are discussed. Experimental bonding techniques using various rubber base adhesives are described. Also included with the most impressive bonding techniques and test results are proposed specifications that describe both the necessary preparation of rubber surfaces and the methods of applying adhesives which proved the most satisfactory as a result of experimental testing.

"This easy-to-use pocket book contains a wealth of up-to-date, useful, practical and hard-to-find information.
