During the mapping, R/3 ORDERS IDoc Mapping maps the segments and data fields of the Complex Data Type structure with the segments and data fields of the R/3 IDoc structure. When the R/3 ORDERS IDoc Mapping receives an inbound message from the Buyer system, in an R/3 ORDERS IDoc message through Application Link Enabling (ALE), it transforms the message into a CRM IDoc message. Similarly, when R/3 ORDERS IDoc Mapping receives an outbound message, in a CRM IDoc message format, it transforms ...

Integrating SAP R/3 and SAP XI with IDoc Adapters (SAP ...

Data extraction from an SAP R/3 source system to BW begins when BW sends a request in the form of a request IDoc. The source system then extracts the data and sends it to the BW system. During this activity of data transfer, the two systems exchange additional information from time to time in the form of info IDocs.

All about Idocs/E Communication between BW and R/3 - SAP Q&A

An ALE Message Handler acts as a bridge between SAP R/3 and another application or multiple other applications. It receives intermediate documents (IDocs) from one or more instances of SAP R/3 and carries them to application(s) for processing. Likewise, it sends IDocs received from applications to one or more SAP R/3 instances.
