~~The Self and Perspective Taking: Contributions and ...~~

~~Being able to take perspective is critical to our relationship with our self and others. While this is not something typically talked about in behavior analysis recent advances in our understanding of perspective taking and the development of a sense of self allow us to understand complex behaviors such as taking things personally.~~

~~The self and perspective taking: Relational framing and ...~~

~~Abstract. Although abundant research has documented positive interpersonal outcomes of perspective taking, a growing body of evidence indicates that perspective taking can also induce negative interpersonal outcomes—in other words, it backfires. We aim at integrating these seemingly contradictory findings, suggesting that perspective taking backfires when it causes the perspective-taking individual to feel threatened.~~

~~Self as context refers to the coming together of a set of the perspective taking (i.e., deictic) frames that relate to the ability to observe and describe from a perspective or point of view. Self as context refers to the ability to flexibly shift perspective as needed by the situation.~~

~~Use of I/You Perspective Taking with Highly Self-Critical ...~~

~~This theory is based on the observations of scientists over decades of basic research. Empirical work leading to the CBS approach to the self and perspective taking is in fact almost four decades old, and in that time there has been substantial empirical and theoretical progress (see). Finally, the Functional Contextual approach is pragmatic – it aims to actually change behaviour, not simply describe it as many other approaches within psychology do.~~
