Flowcharts: Step...

Algorithm, Pseudocode
and Flowchart A

flowchart is a schematic representation of an algorithm or a stepwise

Read Online Understanding

process, showing the steps as boxes of various kinds, and their order by connecting these with arrows. Flowcharts are used in designing or documenting a process or program.

Algorithms With Implementation

Algorithm, Pseudocode
and Flowchart -

BrainKart

Algorithms and
flowcharts are two

Read Online Understanding

different ways of presenting the process of solving a problem.

Algorithms consist of steps for solving a particular problem, while in flowcharts, those steps are usually displayed in shapes and process boxes with arrows. So flowcharts can be used for presenting algorithms.

Examples for Algorithm
Flowcharts - Edrawsoft

A flowchart is a graphical
representations of steps.

It was originated from
computer science as a
tool for representing
algorithms and

programming logic but
had extended to use in all
other kinds of processes.

Nowadays, flowcharts
play an extremely
important role in
